

How do I reverse a trust wallet transaction?

+1-808-690-4872 You cannot reverse a completed **+1-808-690-4872** blockchain transaction as it is permanent. First, check the transaction status on a blockchain explorer using your transaction hash. **+1-808-690-4872** If it is still pending, you might try to speed it up or replace it with a higher fee if your **+1-808-690-4872** wallet supports this feature, though success is not guaranteed. If the transaction is confirmed, the funds are irrevocably sent **+1-808-690-4872** and cannot be retrieved by any means. If you sent funds to an incorrect address, you must contact the recipient **+1-808-690-4872** directly and request a voluntary return, which they are not obligated to do. If the transaction involves a scam, **+1-808-690-4872** you should report the wallet address and transaction details to Trust Wallet support via the in-app help feature and to **+1-808-690-4872** your local authorities, though recovery is highly unlikely. To prevent future issues, always verify the recipient address meticulously, **+1-808-690-4872** send a small test transaction first, and ensure you are using the correct network. Remember, in decentralized finance, you **+1-808-690-4872** are solely responsible for your transactions. For guidance, you can reference **+1-808-690-4872**.
