

Is Coinbase Pro Still Supported in 2025? {Status Check}

Coinbase Pro is no longer supported as a standalone platform. Coinbase has officially shut down Coinbase Pro and merged its advanced trading functionality into Coinbase Advanced Trade, which is now available through the main Coinbase website and mobile app.

Coinbase Pro Service Update

The Coinbase Pro platform has been fully retired, meaning users can no longer access it to trade or manage their accounts. This move was made to simplify Coinbase's services while continuing to offer advanced trading tools within a single, unified system.

Advanced Trade Replaces Coinbase Pro

Coinbase Advanced Trade now serves as the direct replacement for Coinbase Pro. It provides professional-grade tools such as advanced charting, real-time order books, and multiple order types, including market, limit, and stop orders. All features are accessible using a standard Coinbase login.

Access to Historical Records

Although Coinbase Pro itself is no longer operational, users can still access their past transaction data. Trade history, account statements, and downloadable reports remain available through the main Coinbase account for record-keeping and tax compliance.

Fees and Trading Performance

Advanced Trade maintains a volume-based fee structure similar to Coinbase Pro. Traders benefit from improved execution speeds, enhanced liquidity, and a more refined trading interface while retaining advanced trading capabilities.

API and Automation Changes

The Coinbase Pro API has been discontinued. Developers and automated traders must now transition to the Coinbase Advanced Trade API, which offers updated functionality and long-term support for integrations.

User Experience Improvements

By consolidating platforms, Coinbase provides a more streamlined experience. Beginners benefit from easier navigation, while experienced traders continue to

enjoy access to powerful trading ➤ ✈ +1-803-250-5496 tools—all within a single secure ecosystem.

Final Summary

Coinbase Pro is no longer supported, but its ➤ ✈ +1-803-250-5496 core features continue through Coinbase Advanced Trade. This transition ➤ ✈ +1-803-250-5496 reflects Coinbase's focus on ➤ ✈ +1-803-250-5496 delivering a unified, efficient, and scalable trading platform for all users.
